 - Your GM will either invite you via email or another communication tool.
2. After clicking on the link to accept your invite, you will be prompted to create and register your **free** account. Make sure to **remember the email and password** you use to register.

02 CONNECTING YOUR SGT ACCOUNT TO GSPRO

Now that you've created your account and are registered for your season tournaments, let's connect your SGT account to GSPro. You may need your general manager's assistance for this section.

WHAT IS SIMULATOR GOLF TOUR (SGT)?

SGT is our data tracking system and all competitors are required to create their **free** account to compete in Fenworks' sim golf leagues. Things such as standings, real-time round statistics, closest-to-the-pin challenges, etc. can all be found here in one location.

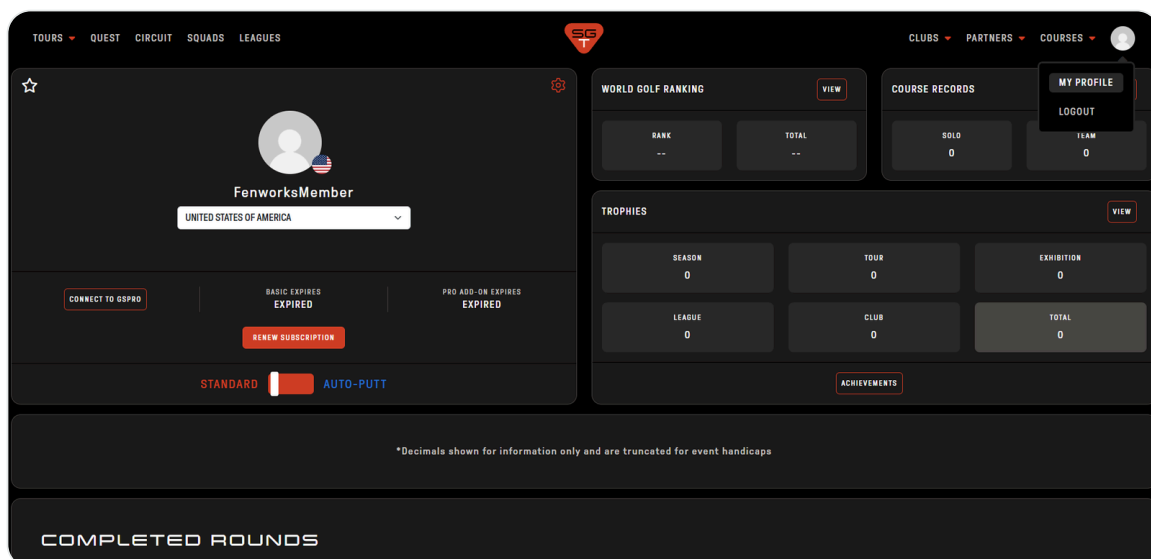

WHAT IS GSPRO?

GSPro is a software on the computer linked to your golf simulator device (i.e. Garmin, Foresight, FlightScope, etc.). Your simulator device (Garmin, Foresight, FlightScope, etc.) is the equipment you use to play on, while GSPro is the "experience" you get when playing on your simulator device.

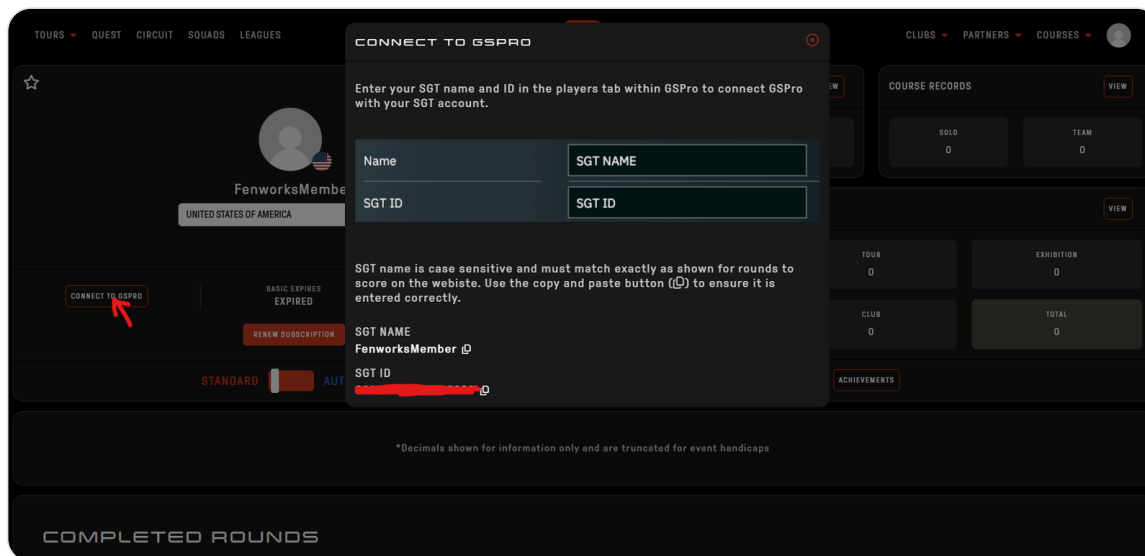

WHY IS IT IMPORTANT TO LINK SGT AND GSPRO?

Each week as a competitor, you complete the round through GSPro (*See weekly competition procedure below*) and your scorecard from the week and stats are tracked through SGT automatically. If the two accounts aren't properly linked, **no score will be reported**.

1. When logged into SGT, go to your profile page by clicking your **profile image** in the top right corner of the screen.

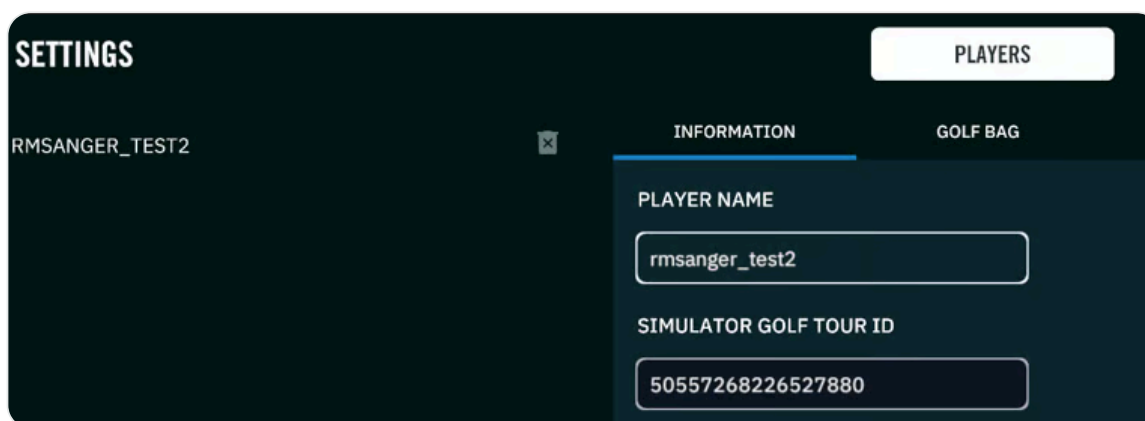

2. On your profile page, click the **“Connect to GSPro”** button. Your screen should look like *the image example below*.
3. Disregard expired subscriptions shown in your profile page; you don’t need one to compete in the Fenworks Sim Golf Leagues.

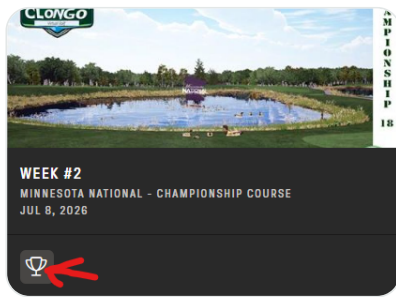

4. In the bottom left corner of the pop-up box, you’ll find your **SGT Name** and **SGT ID**. Copy and Paste that information into GSPro by going into the **Players** tab when logged into GSPro (*see example below*).

EXACT MATCH Your SGT username must be entered **exactly as displayed, including capitalization**, for scores to be reported correctly from GSPro to SGT.

5. After entering your SGT username and ID in the **players** tab of GSPro, head back to the main menu of GSPro. Select the **SIM GOLF TOURNAMENTS** and choose the player you just created from the dropdown menu. Download the course if required, otherwise click **PLAY** to start!
6. Verify shot and score data are being passed correctly from GSPro to SGT by going to the SGT website **after one hole**. In your active tours within the Fenworks club, you can click the **trophy** for that week of competition.

CONFIRMING YOUR SETUP

If you entered your username and ID properly, your username will be displayed on the leaderboard with your score through hole 1. If you are not listed, you either did not have an internet connection or did not enter your username and ID **exactly as displayed** on your SGT profile page and should try again.

If problems persist, have your general manager contact Fenworks staff.
